

It's easy to fix work !

New products

New idea for support jack!

RISING

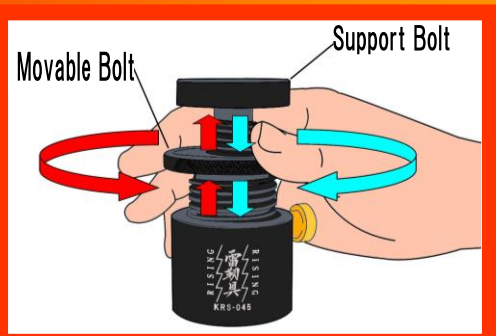

Why is work efficiency increasing with RISING ?

Please check movie.

 **KANETEC**

Work efficiency is increasing by using only one-hand!

It's speedy to adjust height!
Just turn the movable bolt and adjust the overall height.
Don't hurt work so that support bolt don't turn around!

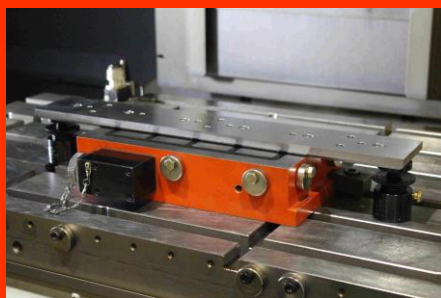

It's easy to fix!
Bolt and Support Bolt can be locked just by tightening a knob.
※If the knob loosens due to vibration or the like, please use the attached grub screw.

Patented

KRS-045 HANDY SUPPORT JACK

RISING

Supports the overhang part of the workpiece and the hollow part of grinding.

Various Option Parts!
